OBJECTIVE

Computer Science and Engineering student seeking software engineering, game development, or related technical opportunities. Experience with full-stack development, Unity, backend systems, databases, and cloud deployment.

EDUCATION

University of California, Merced

B.S. Computer Science and Engineering | 3.83 GPA

Aug. 2023 – Expected Dec. 2026

SKILLS

Languages: C++, C#, Java, Python
Development: Unity, Git, GitHub, Visual Studio, OpenGL, REST APIs
Backend/Data: Flask, FastAPI, SQLite, MariaDB, MySQL
Cloud/Tools: AWS EC2, Docker, Linux, Overleaf

EXPERIENCE

SignTime – Superconnected

Founding Software Engineer

Jun. 2026 – Aug. 2026

Tokyo, Japan

- Led technical design, development, deployment, and documentation of Superconnected from concept to implementation.
- Built Python backend systems integrating email/contact data, AI-powered summarization, and persistent user data.
- Developed and deployed services using Flask, SQLite, Docker, REST APIs, and AWS EC2.

University of California, Merced

Applied Mathematics Learning Assistant

Aug. 2024 – Present

Merced, CA

- Teach and mentor engineering students in Pre-Calculus, Calculus I, and Calculus II through individual and group instruction.
- Explain mathematical concepts and problem-solving strategies while collaborating with instructors and Learning Assistants.

University of California, Merced

Undergraduate Research Assistant

Jan. 2026 – May 2026

Merced, CA

- Developed an auto-battler in Unity and trained ML-Agents using Proximal Policy Optimization (PPO).
- Analyzed agent behavior and training results to guide gameplay and experimental design changes.

Semcorel Inc.

Unity Developer

Aug. 2025 – Dec. 2025

California

- Integrated backend server and database functionality into a Unity-based cognitive testing application.
- Developed and debugged C# components connecting Unity with FastAPI and database services.

PROJECTS

Binding of Neil

Aug. 2025

- Developing an independent game project combining game development, design, and mathematics.

Project Horizon – UCM GDC Game Jam

1st Place, Spring 2026

- Developed a game for the UC Merced Game Development Club Spring 2026 Game Jam, earning 1st place.

Remediation – Aqua Arcade Game Jam

1st Place, Spring 2024

- Developed an educational aquifer-pollution game with a four-person team, contributing programming, visual assets, and UI.

Multiplayer Mario Web Game

May 2026

- Developed a multiplayer Mario-inspired web game featuring online PvP and cooperative gameplay.

Game projects: steg1118.itch.io

LEADERSHIP

- Led technical development and architectural decisions for Superconnected while coordinating with and supporting teammates.
- Mentor UC Merced students in Pre-Calculus, Calculus I, and Calculus II as a Learning Assistant.
